PROJECT OVERVIEW

CEO Decision- Intelligence Agent

An always-on chief-of-staff. One trustworthy read on the whole company, every Monday morning.

MCP Connectors

Claude Tool Use

Cowork

90 min

saved every Monday

4

data sources unified

~2 days

earlier risk surfacing

0

manual hours for team

THE PROBLEM

Leadership context is scattered

90 minutes every Monday to compile what the CEO still doesn't fully have.

Slack

200+ messages across 12+ channels

Asana

40–80 task updates per week

GitHub

Dozens of PRs, CI runs, blockers

Finance Drive

Exports nobody annotated

90+

minutes every Monday
manually pulling context together

2 days

avg signal lag

0 time

left for decisions

Still

misses buried risks

"By the time I finish reading the weekly update, the issues are already two days old."

— Composite CEO feedback

HOW IT WORKS

Four steps, every Sunday night → Monday morning

01

Connect

Read-only MCP servers attach to Slack, Asana, GitHub and Google Drive. Zero write permissions — the agent is a listener, not an actor.

Slack MCP

Asana MCP

GitHub MCP

Drive MCP

02

Pull

Every Sunday at 11 PM the agent fetches the week's deltas — shipped work, blocked items, spend movements, team sentiment.

Weekly delta

Sentiment scan

Spend diff

03

Synthesise

Claude processes all signals together, ranks findings by urgency × blast radius, and writes a structured three-section briefing.

Claude tool use

Risk ranking

Decision framing

04

Deliver

The briefing lands in the CEO's inbox and Slack at 7 AM Monday. Every claim links back to its source — one tap.

Email

Slack DM

Source drill-down

ARCHITECTURE

Built on Claude with tool use over read-only MCP servers

DATA SOURCES (Read-only MCP)

Slack

Asana

GitHub

Google Drive

ORCHESTRATION (Cowork)

Schedules run Sun 11 PM

Passes context bundles

Handles retries

Triggers delivery

INTELLIGENCE (Claude + Tool Use)

Signal fusion

Source linking

DELIVERY

CEO email · Slack DM · 7:00 AM Monday · 15-min read · Full source drill-down

KEY FEATURES

Five capabilities that earn their place

No dashboard bloat. Every feature serves the CEO's Monday morning.

1

MCP Read-Only Connectors

Slack, Asana, GitHub & Drive connected via MCP. No write permissions. Privacy-safe by design.

Slack

Asana

GitHub

Drive

2

Risk & Decision Ranking

Every item scored by urgency $\times$ blast radius. CEO sees the five things that matter — not a flat list of forty.

Urgency $\times$ blast-radius

Top-5 only

3

One-Tap Source Drill-Down

Every briefing line carries a deep link. Tap any claim and land on the exact thread, task, or doc that generated it.

Deep links

Zero hunting

4

Auto-Delivered at 7 AM Monday

Cowork schedules the run every Sunday at 11 PM. The briefing is ready before the CEO opens their inbox.

Cowork scheduling

Email + Slack

5

Zero Manual Compilation

No ops person assembles the update. No chief-of-staff formats a deck. System runs, CEO reads.

Fully automated

Replaces 90-min prep

RESULTS & IMPACT

Three numbers that justify the build

90 min

saved — every single Monday

~2 days

earlier average risk surfacing

Zero

manual status compilation by the team

What this unlocks

- Monday meetings shift from update-reading to decision-making
- Ops and CoS bandwidth freed from the weekly context-compile task
- Risks flagged before they escalate — average two days earlier
- Every claim traceable to its source — no need to ask anyone
- Briefing improves over time as risk-ranking learns CEO's patterns

"The 15-minute brief is the one thing I read before any Monday call."

— Target CEO persona

menler

Your turning point in the AI era.

One briefing. Every Monday. Full company clarity.

The CEO Decision-Intelligence Agent connects your tools, synthesises the week, and delivers a ranked 15-minute brief — automatically, every Monday at 7 AM.

Thank you.
