PRODUCT OVERVIEW

Content & Outreach Engine

A campaign engine that expands one strategic brief into a full multichannel sequence — on brand and on schedule.

Prompt patterns

Skills

MCP

3×

content output velocity

5

channels from one brief

One

consistent author voice

Zero

brand drift across authors

THE PROBLEM

One brief, five channels, and brand voice drifts every time

Turning a single brief into blog, email, social and ads consistently is slow — and the voice drifts across channels and authors every time.

Blog

Written separately, no shared brief or voice guide

Email

Different tone each send, no format consistency

LinkedIn

Copy from a different author every sprint

Ads & Sales

Sequences and variants written from scratch

Days typical brief-to-live
across a full campaign

Voice

drifts every sprint

No shared

brief or template

Variants

written from scratch

"We brief a campaign and get five pieces of content that sound like five different companies. There's no single voice we can point to."

— Composite marketing team feedback

HOW IT WORKS

Four steps, from one brief to a live multichannel campaign

01

Brief

One strategic brief is the input — positioning, audience, goal and tone. Everything downstream derives from it.

Positioning

Audience

Goal

Tone guide

02

Generate

Blog post, email sequence, LinkedIn variants and ad copy are generated in parallel from the brief.

Blog post

Email sequence

LinkedIn variants

03

Enforce

A reusable brand-voice Skill runs over every output and corrects tone, word choice and format before publish.

Voice check

Tone correction

Format enforce

04

Schedule

The full sequence is scheduled across channels and A/B variants are set up automatically.

Channel publish

A/B variants

Campaign timing

KEY FEATURES

Four capabilities that earn their place

No disconnected tools. Every feature serves the brief all the way to live.

1

One Brief into Five Channels

A single brief generates blog, email, LinkedIn, ad copy and sales sequences — coordinated and consistent.

Blog

Email

LinkedIn

Ads

2

Brand-Voice Skill

A reusable Skill locks tone, word choice and format. Every output passes through it before publish — regardless of channel.

Tone lock

Format enforce

3

Built-In A/B Variant Generation

Subject lines, headlines and CTAs are generated in A/B pairs automatically — ready to drop into any test framework.

Auto A/B pairs

Test-ready

4

Cross-Channel Scheduling

MCP connectors push each asset to its channel on the right day and time — blog, email, social and ads all in sequence.

MCP publish

Timed sequence

ARCHITECTURE

Prompt patterns and a brand-voice Skill, with MCP connectors into publishing and scheduling tools

INPUT (Strategic brief)

Positioning

Audience

Goal

Tone guide

GENERATION (Prompt patterns)

Blog post

Email sequence

LinkedIn copy

Ad variants

ENFORCEMENT (Brand-voice Skill)

Voice check

Tone correction

Format enforce

A/B pairs

DELIVERY

Blog · Email sequence · LinkedIn posts · Ad copy · Sales sequences · Scheduled and live

RESULTS & IMPACT

Three numbers that justify the build

3×

content output velocity

One voice

across every channel and author

Faster

brief-to-live turnaround

What this unlocks

- Marketers brief once and the campaign writes itself
- Brand voice is consistent regardless of who authored which piece
- A/B variants generated automatically — no manual duplication
- Five channels scheduled from one brief, not five separate briefs
- The voice Skill improves as the brand evolves — redeploy once, consistent everywhere

"We used to spend two days turning a brief into campaign assets. Now it's a morning. And it sounds like us every time."

— Composite marketing lead feedback

Your turning point in the AI era.

**One brief.
Every channel.
Always on brand.**

The Content Engine takes one strategic brief and expands it into a full multichannel campaign — consistent voice, A/B ready, scheduled and live.

Thank you.
