PRODUCT OVERVIEW

Deal-flow Triage Agent

A first-pass analyst that turns an inbox full of pitch decks into partner-ready memos.

Claude API

Tool Use

RAG

70%

less screening time

4

data sources ingested

1 memo

per deal, auto-drafted

THE PROBLEM

Associates burn hours on every inbound deck

Weak signal buries the few companies that actually fit the fund's thesis.

Pitch Decks

PDFs, links and decks from any source

Founder Emails

40–80 task updates per week

Public Data

Crunchbase, LinkedIn, news and filings

Past Deal Memos

Fund thesis and historical decisions

200+ decks inbound
every month — manually screened

No standard

memo format

Buried

thesis-fit deals

200+

per deck reviewed

"We see 200+ decks a month. We can't read every one. We need a first filter that actually knows our thesis."

— Composite CEO feedback

HOW IT WORKS

Four steps, from inbox to partner memo

01

Ingest

Pitch decks, founder emails and public data are ingested and parsed into raw deal signals.

Pitch decks

Founder emails

Public data

Crunchbase

02

Extract

Team, market, traction and the ask are pulled into a structured deal profile.

Team profile

Market size

Traction data

03

Score

Fit is scored against the fund thesis using RAG over historical memos and investment criteria.

Thesis RAG

Fit scoring

Red-flag scan

04

Draft

A partner-ready memo is drafted, plus follow-up questions tailored to the specific deck.

Partner memo

Follow-up Qs

Fit rationale

KEY FEATURES

Four capabilities that earn their place

No noise. Every feature serves the partner's review process.

1

Deck and Email Parsing

Slack, Asana, GitHub & Drive connected via MCP. No write permissions. Privacy-safe by design.

PDF parsing

Email ingestion

URL enrichment

Data extraction

2

Risk & Decision Ranking

RAG over historical memos and investment criteria. Fit score with cited reasoning — not a black box.

Urgency × blast-radius

Cited reasoning

3

Auto-Drafted Follow-Up Questions

Ready-to-send follow-up question list tailored to the specific deck — gaps, red flags, and ask clarity.

Personalised Qs

Founder-ready

4

Red-Flag Detection

Flags inconsistent traction claims, missing market evidence, and ask mismatches before partner time is spent.

Traction checks

Market validation

ARCHITECTURE

Claude API with tool use and a RAG layer over fund documents

INPUTS (Parsed by Claude)

Pitch decks

Founder emails

Public data

Crunchbase / news

INTELLIGENCE (Claude API + Tool Use)

Deal profile extraction

Thesis fit scoring

Red-flag detection

Follow-up drafting

RAG LAYER (Fund documents)

Historical memos

Investment criteria

Past decisions

Thesis documents

DELIVERY

Partner memo · Follow-up questions · Fit score · Red flags · Thesis citations

RESULTS & IMPACT

Three numbers that justify the build

70%

less time on initial screening

Consistent

memo format across the team

More

thesis-fit deals reach partner review

What this unlocks

- Associates redirected from reading to deciding
- Every memo traces reasoning back to thesis documents
- Red flags surfaced before partner time is spent
- Every claim traceable to its source — no need to ask anyone
- Follow-up questions drafted and ready to send

"The agent handles the inbox. We handle the conviction."

— Target VC team persona

menler

Your turning point in the AI era.

One inbox.

Zero missed signals.

Partner-ready in minutes.

The Deal-flow Triage Agent reads every inbound deck and email, scores fit against your thesis, and delivers a partner-ready memo — automatically.

Thank you.
