PRODUCT OVERVIEW

Insights-to-PRD Pipeline

A discovery copilot that converts raw user signal into structured product requirements.

Claude Projects

Multimodal

Cowork

5×

faster discovery-to-PRD

4

signal sources unified

100%

requirements evidence-backed

1

shared opportunity backlog

THE PROBLEM

User signal piles up faster than any PM can synthesise

Interviews, tickets, NPS and sales notes pile up unread — insights get lost, PRDs start blank.

Interview Transcripts

Hours of user calls with no structured output

Support Tickets

Hundreds of tickets with no pattern extraction

NPS Comments

Verbatim feedback sitting in a spreadsheet

Sales Notes

Call recordings no one has time to review

80% of insights
never make it into a PRD

Blank page

every PRD

No shared

opportunity backlog

Weeks

lost to manual synthesis

"We have all this feedback. But by the time we synthesise it, we've already guessed half the requirements."

— Composite PM feedback

HOW IT WORKS

Four steps, from raw signal to shipped requirements

01

Ingest

Interview transcripts, support tickets, NPS comments and sales notes are ingested.

Transcripts

Tickets

NPS comments

Sales notes

02

Cluster

Signals are clustered into themed opportunities and recurring pain points by frequency.

Theme clusters

Pain frequency

Opportunity rank

03

Draft

Claude drafts a PRD with problem statement, goals and acceptance criteria per requirement.

PRD structure

Acceptance criteria

Goal framing

04

Trace

Every requirement is linked back to the user quotes and tickets that justify it.

PRD output

Quote links

Opportunity stack

KEY FEATURES

Four capabilities that earn their place

No dashboard bloat. Every feature serves the CEO's Monday morning.

1

Multi-Source Feedback Clustering

Transcripts, tickets, NPS and sales notes clustered into themes automatically.

Interviews

Tickets

NPS

Sales notes

2

Risk & Decision Ranking

Problem statement, goals and acceptance criteria drafted from clustered insights — ready to edit.

Problem statement

Acceptance criteria

3

Quote-Level Traceability

Every requirement links back to the exact user quotes and tickets that justify it.

Source quotes

Full traceability

4

Themed Opportunity Stack

Opportunities ranked by signal frequency — a shared backlog the whole team can work from.

Frequency rank

Shared backlog

ARCHITECTURE

Claude Projects with multimodal ingestion and Cowork for drafting

INPUTS (Multimodal ingestion)

DELIVERY

Structured PRD · Opportunity stack · Quote traceability · Acceptance criteria

RESULTS & IMPACT

Three numbers that justify the build

5×

faster discovery-to-PRD turnaround

100%

of requirements evidence-backed

One

shared opportunity backlog the team trusts

What this unlocks

- PMs redirected from synthesis to decision-making
- Every requirement backed by real user quotes
- Recurring pain points surfaced automatically
- PRD review time halved — no more “where did this come from?”
- Discovery and PRD in one workflow, not two

“We used to spend two weeks in discovery before writing a single PRD line. Now it’s one session.”

— Composite PM persona

Your turning point in the AI era.

One signal source. Every requirement justified. PRD in hours, not weeks.

The Insights-to-PRD Pipeline synthesises every piece of user feedback into structured requirements — with traceability back to the evidence.

Thank you.
