PRODUCT OVERVIEW

PMO Status Agent

An agent that writes the weekly leadership update, grounded in what actually happened.

MCP

Cowork

Skills

6+ hrs

saved per PM per week

3

tool sources unified

Zero

manual status writing

One

consistent update format

THE PROBLEM

PMs lose hours every week stitching together status

Jira boards, commit logs and stand-up notes live in separate tools — with no single view of what's actually happening.

Sprint Boards

Ticket updates, velocity and blockers in Jira

Code Commits

PRs merged, deploys and CI status in Git

Stand-up Notes

Daily blockers and decisions in Confluence or Notion

Executive Calendar

Weekly review with no pre-drafted update

3 hrs minimum spent
writing status every week per PM

No single

source of truth

Late

slip detection

Inconsistent

format every team

"I spend Friday afternoon pulling together status from five different places. By the time I send it, half the team has already moved on."

— Composite PM feedback

HOW IT WORKS

Four steps, from raw project data to leadership update

01

Read

MCP connectors pull live data from sprint boards, code commits and stand-up notes.

Jira boards

Git commits

Stand-up notes

Sprint velocity

02

Build

Progress, blockers and slippage are combined into one timeline across all three sources.

One timeline

Blocker map

Slippage delta

03

Flag

Milestones trending late are flagged before they actually miss — not after.

Risk scoring

Trend analysis

Late detection

04

Draft

The leadership update is drafted in the team's voice, with risks and next-week asks.

Exec update

Risk callouts

Next-week asks

KEY FEATURES

Four capabilities that earn their place

No dashboard bloat. Every feature serves the CEO's Monday morning.

1

Jira, Git and Notes Unified

Sprint boards, code commits and stand-up notes pulled into a single timeline automatically.

Jira

Git

Confluence

Notion

2

Risk & Decision Ranking

Milestones trending late are flagged before they actually slip — giving leadership time to act.

Trend scoring

Pre-miss alerts

3

Exec-Ready Update in Your Tone

The weekly update is drafted in the team's voice — ready to send with minimal editing.

Team voice

Minimal edits

4

Explicit Asks for Leadership

Decisions, unblocks and budget requests are surfaced explicitly — no hunting through paragraphs.

Decisions needed

Unblock requests

ARCHITECTURE

MCP connectors, Cowork scheduling and Skills for the report format

INPUTS (MCP Connectors)

Jira / sprint boards

Git commits

Stand-up notes

CI / deploy logs

ORCHESTRATION (Cowork)

Schedules weekly run

Passes source bundles

Handles retries

Triggers delivery

INTELLIGENCE (Claude)

Timeline fusion

Slippage scoring

Risk callouts

Ask extraction

DELIVERY

Leadership update · Risk flags · Slippage alerts · Next-week asks · Skills-locked format

RESULTS & IMPACT

Three numbers that justify the build

6+ hrs

per PM per week saved on status writing

Fewer

surprise slips at leadership review

One

consistent update format across all projects

What this unlocks

- Leadership enters review having already read a grounded update
- Slippage spotted before the miss — not after the post-mortem
- Explicit asks mean unblocks happen faster
- PMs spend Friday closing out work, not writing about it
- Skills lock the format so every project update looks the same

“Friday used to mean three hours of copy-paste. Now I review the draft, make two edits, and send it.”

— Composite PM persona

menler

Your turning point in the AI era.

**Every project.
Every week.
No manual work.**

The PMO Status Agent reads your project tools, surfaces what matters, and drafts the leadership update — automatically, every week.

Thank you.
