WHO WE ARE

# India's only Claude-native Operator-led AI Learning brand.

*Built by operators who ship real AI systems.*

Menler is built by operators who have shipped real AI systems, automated workflows, and built products with Claude as the primary intelligence layer. We are built around one conviction: the students & professionals who own Claude will own their workflows and the workflows are where the next decade of value is built.

## OUR MISSION

Build a million AI-native professionals powering India's next decade of growth.

## OUR APPROACH

Every curriculum decision is made inside Claude.  
Every session runs on Claude because it works when the stakes are real.

## OUR CREDENTIAL

Member of the Anthropic Claude Partner Network.  
India's first Claude-native AI upskilling brand.

## WHAT THE BUILDERS SAY ABOUT AI NATIVE

"I am certain 100% of everybody's jobs will be changed by AI."

**Jensen Huang**

Founder & CEO · NVIDIA

"AI is probably the most important thing humanity has ever worked on."

**Sundar Pichai**

CEO · Google

"The obvious tactical thing is just get really good at using AI tools."

**Sam Altman**

CEO · OpenAI

"Powerful AI could arrive as early as 2026 build for it now."

**Dario Amodei**

Co-Founder & CEO · Anthropic

# 500+

Companies are hiring AI Native professionals across AI first startups, consulting firms, enterprise AI teams, GCCs, and product companies.

# 100+

New AI Native roles have been introduced across hiring functions in the last two years.

# Practitioners who ship. Not just teach.

Every practitioner member has deployed real AI systems in their own domain, before bringing it into the classroom.

**Sachin Roy**

ANTHROPIC CLAUDE  
PARTNER NETWORK

India's only Claude-native AI upskilling brand. Our curriculum, projects, and certification pathway are built on the same foundation that enterprise AI teams use.

# Beyond ChatGPT. Beyond prompts. Into systems.

*Most people use AI like a search engine. Fluency means using it like infrastructure.*

AI Fluency is not about knowing every tool. It is about understanding how AI actually works, and building the instinct to deploy it inside your real work. A fluent user is designing systems, delegating tasks, and shipping outputs while others are still figuring out what to prompt.

THE FLUENCY LADDER

|                    |                                                                                                                     |                                                |
|--------------------|---------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| LEVEL 0<br>Curious | You have heard of ChatGPT. Tried it once or twice. Not sure if it is useful for your actual work.                   |                                                |
| LEVEL 1<br>Aware   | You use AI occasionally, mostly for writing or summarising. You follow the output but do not direct it with intent. |                                                |
| LEVEL 2<br>Fluent  | You have a configured AI workspace. You use Claude across multiple tasks. You build workflows, not just prompts.    | <a href="#">THE KICKSTARTER TAKES YOU HERE</a> |
| LEVEL 3<br>Native  | AI is infrastructure, it runs inside every role, every decision, every output.                                      | <a href="#">THE FELLOWSHIP →</a>               |

BEFORE VS AFTER AI FLUENCY

| BEFORE AI FLUENCY    | AFTER AI FLUENCY       |
|----------------------|------------------------|
| Writes prompts       | ✓ Designs systems      |
| Does tasks           | ✓ Delegates tasks      |
| Uses AI occasionally | ✓ AI works every day   |
| Individual outputs   | ✓ Repeatable workflows |
| One chat             | ✓ Connected workspace  |

The Kickstarter takes you from **Level 0 or 1 to Level 2** in two weekends. No prior AI experience required. No coding required.

# The AI era is not waiting.

*Adoption is universal. Capability is not.*

80%

of companies want their professionals using AI tools at work daily

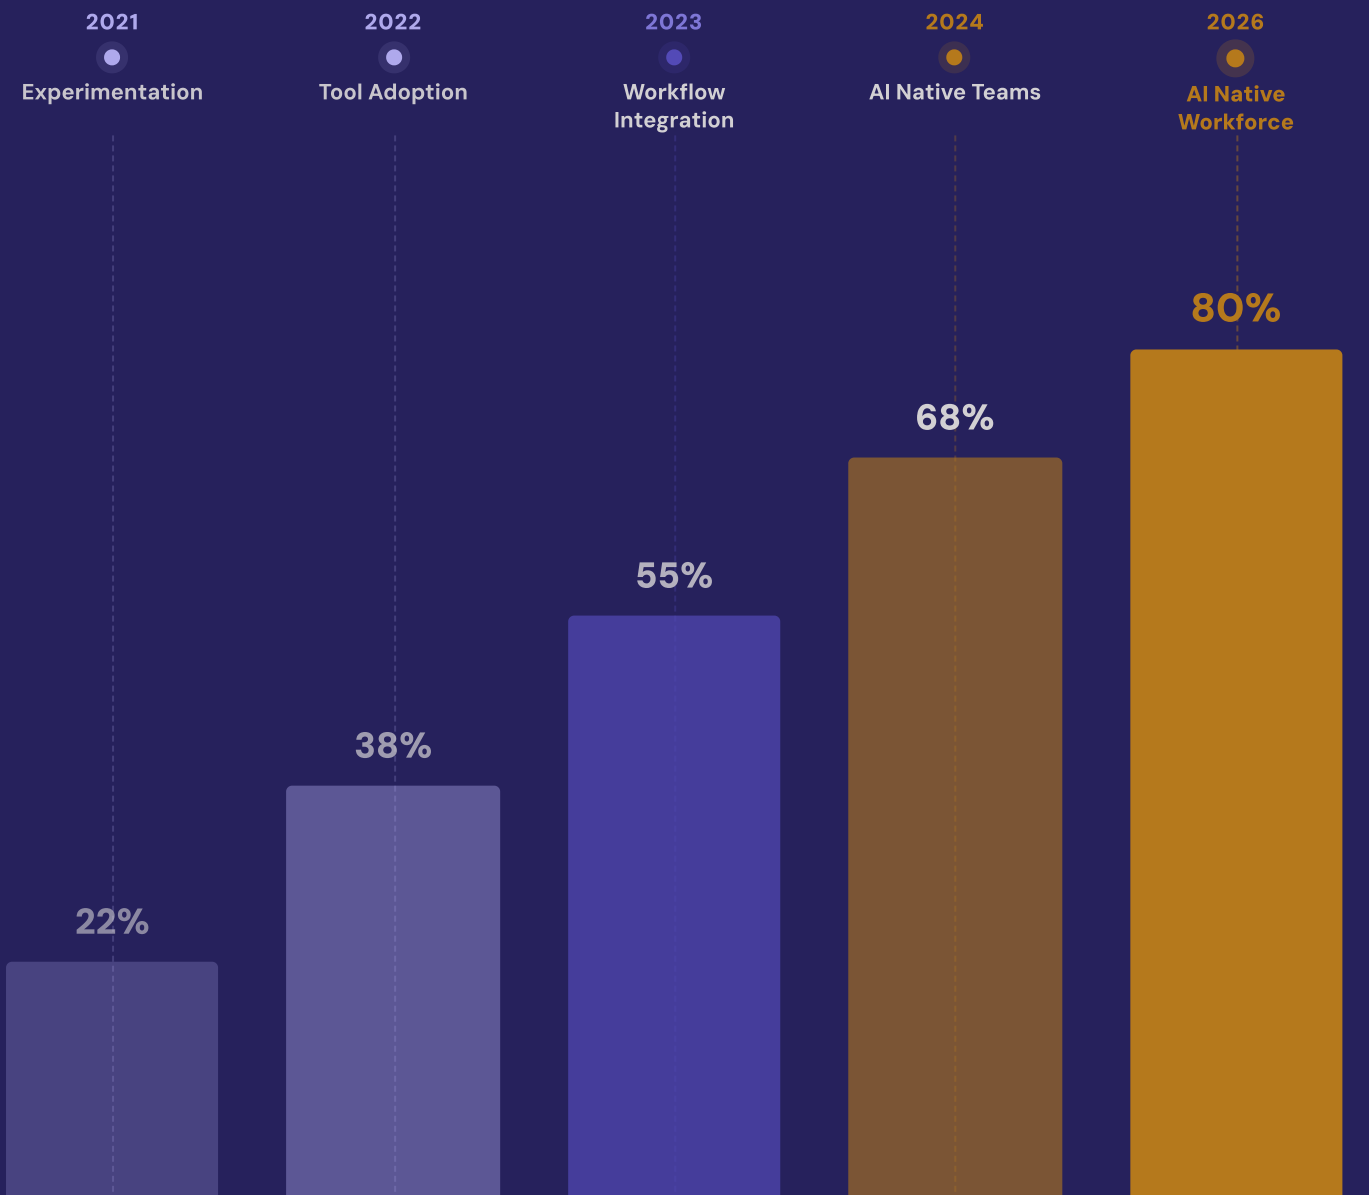

10×

faster output with structured, AI-native workflows

Rs.75L

top salary for AI-native roles in India, 2026

AI DEMAND IN INDIA'S WORKFORCE. % OF COMPANIES SEEKING AI-NATIVE TALENT

# The gap between using AI and working with AI.

*Everyone has access. Almost no one has the system.*

WHERE THE GAP SHOWS UP

At Work

Asked to "use AI" with no training · colleagues who prompt better advance faster · tools adopted, no one can orchestrate them

At Learning

Hundreds of courses, none build real skill · no path from beginner to operator · certifications without projects are worthless

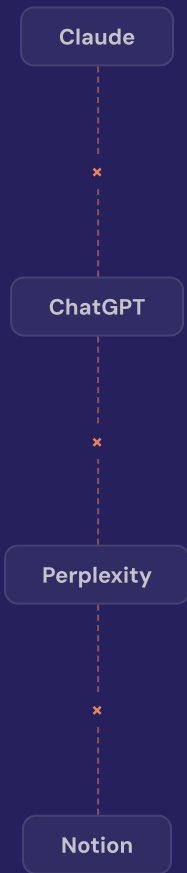

At Building

Projects stall at the "ChatGPT experiment" stage · no domain relevant portfolio · no feedback loop to validate work

At Implementation

Can't move from idea to working system · missing the multi-agent automation layer · skills don't transfer when stakes are real

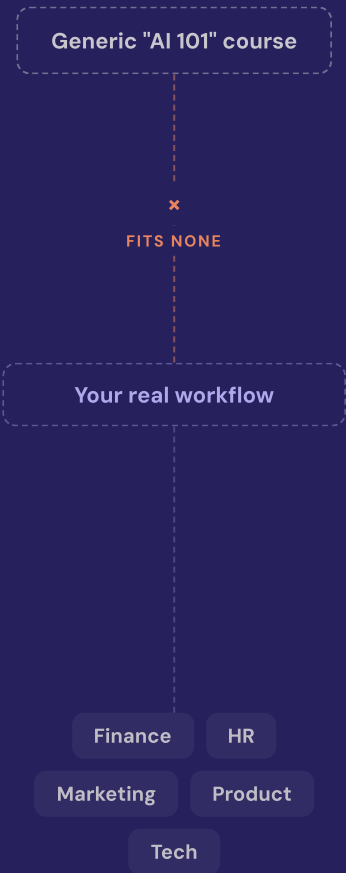

01 No Framework

No connections

Four tools, zero system. Prompt by prompt, nothing compounds.

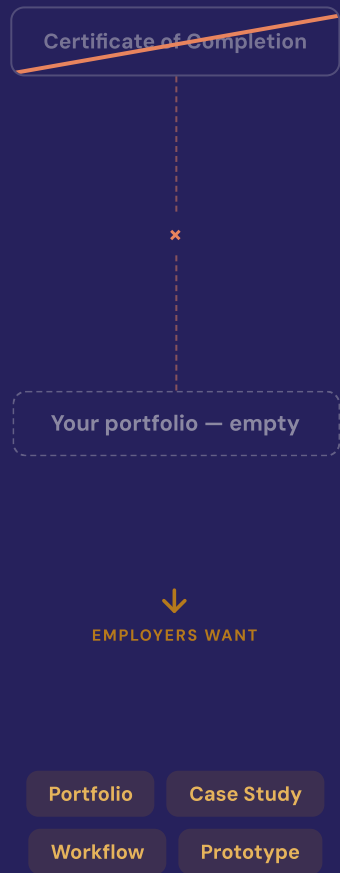

02 No Domain Fit

5 domains · 1 generic course

Covers the basics. Fits no one's real work.

03 No Proof of Work

Certificate ≠ capability

They want what you built, not what you watched.

# AI tools came for software. Claude is coming for the *AI tools themselves*.

ChatGPT disrupted search and writing. Cursor disrupted coding. Figma disrupted design. n8n disrupted automation. Claude is quietly absorbing all of them, chat, code, design, automation, agents into a single reasoning environment. Not a product upgrade. A platform shift.

## WHY CLAUDE? SIX PRACTITIONER REASONS.

01

### It reasons. Others respond.

Holds multi step arguments, identifies gaps, returns structurally better output.

Frame → Reason → Conclude

02

### Context that holds the whole problem.

Feed it a 50 page document or an entire conversation, and it holds it.

Whole brief in context **200K**

token context window

03

### Honest by architecture, not policy.

Constitutional AI trained into reasoning. It declines to fabricate.

"I don't have enough to answer that — here's what's missing."

✓ DECLINES TO GUESS

04

### One model. Every workflow.

One reasoning environment, the full stack without context switches.

Claude

Code Design Routine

05

### The market already decided.

Anthropic is the model partner for the teams that hire.

Frontier labs Tier-1 SIs GCCs

Big 4 advisory

06

### Built the way an operator would.

Every curriculum decision is made inside Claude.

✓ Curriculum built in Claude

✓ Every project ships on Claude

# Why the Kickstarter exists.

*Most AI courses teach prompts. We teach systems. The Kickstarter is the entry point.*

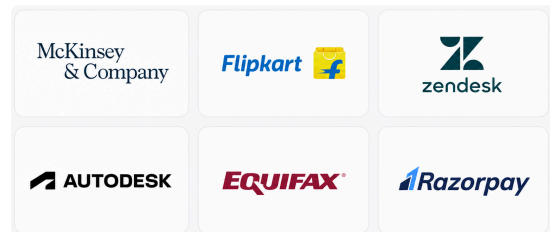

01

## Learn from AI Builders

Faculty ship real AI systems. Live sessions are working walkthroughs of real decisions.

YOUR MENTORS COME FROM

AI Builders > Influencers

02

## Build Real AI Projects

Every session ships a portfolio deliverable. By Demo Day: 4 public URL projects proof, not slides.

- 01 Personal AI OS
- 02 Research Engine
- 03 AI Assistant
- 04 Automation Suite

4 Shipped Projects

03

## Claude-First by Design

Every session and project runs on Claude daily practice builds the operator's instinct.

## The On-Ramp to the Fellowship

Finish the Kickstarter and enter the 10 week Fellowship with a working Claude OS already live.

2 Week Kickstarter  
Claude OS foundation

10 Week Fellowship  
Flagship program

On-Ramp Ready

**Ready to go deeper?** The Claude AI Generalist Fellowship is our 10 week flagship 6 Domain AI Specialist Tracks, Claude AI Specialist Certification.

**Rs.59,999**

Starts Aug 08 · [menler.in/fellowship](https://menler.in/fellowship)

WHO THIS IS FOR

# Built for every curious mind from school to boardroom.

*No prerequisites. No coding background. Just the drive to work smarter.*

## **Students** · School · College · University

You are building your career at the exact moment AI is reshaping every industry. Build a portfolio before your first job application.

## **Educators & Teachers** · School · College

AI is entering your classroom whether you lead it or not. Get the fluency to guide students and upgrade your own practice.

## **Early-Career Professionals** · Any

Domain

HR, Marketing, Finance, Operations, Product every role now has an AI expectation. Build the foundation before your colleagues do.

## **Career Switchers** · Returning · Pivoting

A portfolio of real AI projects is more credible than any certification. Two weekends and you have proof of work to show.

### WHAT YOU BRING

- ✓ Curiosity — any level, any background
- ✓ A device and a stable internet connection
- ✓ One real problem from your work, studies, or life
- ✓ Willingness to show up and build across two weekends
- ✓ An open mind — the tools will surprise you

### WHAT MENLER PROVIDES

- ⚡ Live sessions led by practitioners from top companies
- ⚡ Claude-first curriculum covering 10+ GenAI tools, hands-on
- ⚡ 4 AI Fluent portfolio projects — built live, publicly shareable
- ⚡ Kickstarter Certificate + lifetime community access
- ⚡ Internship and placement opportunities across AI-first companies

# Two weekends. Four live sessions. One portfolio.

*Weekdays: 30 minute pre reads. Weekends: live sessions where everything clicks.*

WEEKEND 1 · FOUNDATION

Sat + Sun · 2 hrs each

S01

SATURDAY

PROJECTS YOU WILL BUILD

P01

#### Personal AI Operating System

Your Claude OS — prompt, Skills, Connector, knowledge doc.

P02

#### AI Research Intelligence System

A repeatable, documented research pipeline anyone can run.

P03

#### Automation Suite — 3 Systems

Save 2+ hrs/week: a Schedule + 2 Routines + 1 external Zap.

P04

#### Capstone — Real Problem Solved

An AI-powered solution with Claude at the core. Demo Day.

# Where alumni land.

*Designed to make you job ready, not just AI-aware.*

01

**Frontier Labs & Partners**  
Anthropic partner channels, Tier-1 integrators, core deployment teams.

02

**AI-First Startups**  
Early to mid stage scaleups built entirely on foundation model APIs.

03

**Top-Tier Consulting**  
MBB digital practices, Big 4 AI advisory, boutique transformation agencies.

04

**Enterprise AI Teams**  
Global Capability Centers, banking conglomerates, Fortune 500 tech divisions.

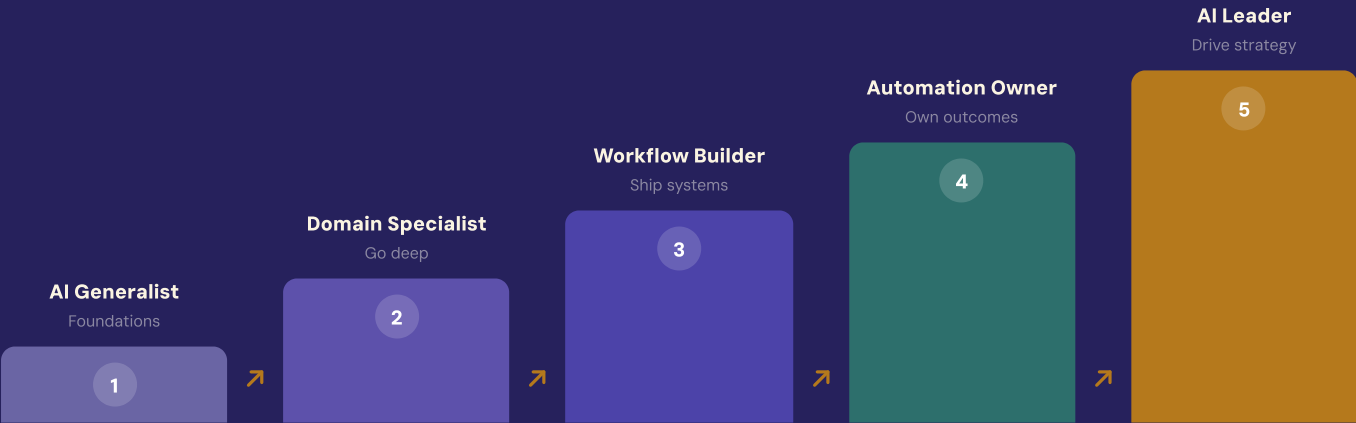

05

**AI-Native Product Cos**  
Established SaaS platforms and consumer tech moving into the AI-first era.

06

**Independent Consulting**  
Sovereign operators running high margin AI workflow automation practices.

# From operators, employers, and fellows.

“

We're seeing plenty of AI certificates in the market. What's rare are candidates who can demonstrate real builds. Menler's portfolio-led model makes evaluation significantly easier.

**Talent Partner**  
High-Growth SaaS Company

“

What stood out was the portfolio-first approach. Fellows aren't just learning concepts — they're shipping assets, agents, and workflows that can be reviewed by employers.

**Hiring Manager**  
AI-First Startup

“

We've interviewed dozens of AI-certified candidates this year. Menler fellows are the only ones who walk in knowing the difference between prompting and orchestrating. That gap is significant.

**Talent Partner**  
Enterprise SaaS Company

“

The portfolio-first model solves our biggest screening problem. We can review actual builds before the first call — that alone cuts our evaluation time in half.

**Hiring Manager**  
AI-First Consulting Firm

“

The programme gave me a structured way to go from idea to deployed agent. The capstone review process alone was worth the fellowship fee.

**Priya Nair**  
Beta Fellow · Product Manager · Fintech

“

I joined expecting another AI course. Instead, I left with a portfolio I could actually discuss in interviews and a much clearer understanding of how AI is used inside real businesses.

**Aditya Rao**  
Beta Fellow · Operations Manager · Logistics Startup

**Hiring associations · 100+ companies.** Learn from practitioners and showcase your work to experts across AI startups, consulting firms, enterprise AI teams, and product companies.

# Simple. No prerequisites.

*The Kickstarter is open access, anyone ready to show up and do the work is welcome.*

- 1 Visit [menler.in/kickstarter](https://menler.in/kickstarter)** Anytime · Takes 2 minutes  
Read the programme details, confirm the dates, and click Enrol Now. No application form. No waiting list.
- 2 Complete Payment** Rs.4,999 · Incl. all taxes · One time  
Secure checkout. Payment confirms your seat. Cohort is capped — early payment guarantees your place.
- 3 Receive Onboarding Pack** Within 24 hours of payment  
Welcome email with pre read access, Discord community invite, tool setup guide, and Session 01 prep brief.
- 4 Show Up and Ship** JULY 2026  
Attend all 4 live sessions. Complete daily pre reads (30 min). Build 4 projects. Present at Demo Day.

## WHAT HAPPENS AFTER YOU ENROL

## WHAT'S INCLUDED

- ✓ 4 Live Sessions Across 2 Weekends (Sat + Sun · 2 hrs each)
- ✓ 4 Portfolio Deliverables: AI OS · Research · Automation · Capstone
- ✓ Menler AI Kickstarter Certificate — LinkedIn shareable
- ✓ Claude OS hands-on build — Projects, Skills, Connectors, Routines
- ✓ Demo Day + Peer Review — present live, get feedback, ship
- ✓ AI Resource Library — prompt packs, templates, tool guides

READY TO BECOME AI FLUENT?

# From curious to fluent. Your turning point starts *here.*

Two weekends. Four projects. One portfolio that proves you can use AI,  
not just talk about it.

| START DATE | DURATION   | SESSIONS       | TRACK     |
